

Add these awesome activities into your programme:

HAPAZOME:

Let our Learning and Heritage Facilitators guide your group through Hapazome:

An ancient Japanese technique of extracting natural dyes from plants and flowers using... hammers!

Fun, unusual and ready to fire the imagination of the creative that is in us all.

Art, Science, DT and History are amongst curriculum based aspects of learning from this creative activity. Not to mention huge amounts of fun with hammers!

FOSSIL MAKING:

Release your inner palaeontologist! With a measurement here and a stirring there; you can travel back millions of years in time.

Using quick set Plaster of Paris and some creative know how; each participant will create their own

fossil to take home.

Art, Science, DT and History are amongst curriculum based aspects of learning from this creative activity. Not to mention oceans of fun with some time travelling bugs!

Or, spend the day/half day with us and we can create our own bespoke adventures!

HEADLONG INTO HISTORY:

Bespoke programmes developed with a curriculum base to enhance learning and provide opportunities not usually available at school. Make a neolithic style piece of art, a roman style mosaic, a medieval style stained glass.

Get hands on in our Learning and Heritage space: The Chicken Shed

SCIENCE THE WHOLE OF LIFE IS HERE!

Natural world, plants and trees, pond life, birds, bees, minerals, mammals, bat boxes, bug hotels, geology, fire, chemical reactions...
